

## 2. Instructions for completing the survey

Welcome to the public consultation on the second draft of the FSC International Generic Indicators (IGIs) (FSC-STD-01-004 D2-0).

The following instructions will help you complete the online survey. Please read them before you begin.

- Read the Indicators Drafting Rules included in the preamble of the IGIs (FSC-STD-01-004 D2-0).
- Provide accurate information about yourself. If you are an FSC member, please tell us which sub-chamber you belong to.
- You do not have to complete the survey in one sitting. You can save your answers by clicking the 'Next' button, and then click the 'Exit' button to quit the survey.
- It is also possible to change your responses by clicking the 'Back' button.
- Where you have no opinion to provide for a particular IGI or section, please skip that section and continue filling in the rest of the survey.
- When you have finished, click the 'Done' button.

Please note that all comments made in the survey may be made publicly available, but they will not be directly attributed to the person who made them.

Visit the IGI website for the IGIs Draft 2-0 at [igi.fsc.org](http://igi.fsc.org)

## 22. Part 2

For this Second Public Consultation, the feedback we are seeking is whether you think the IGIs suggested for each criterion include all the measures necessary to verify compliance with that criterion.

In addition to this, and to answer concerns expressed in the first consultation, we also want to know if each IGI is NOT:

- globally applicable (the indicator is generic, can be adapted to different forest types, legislation, etc.);
- auditable (the indicator is SMART – Specific, Measureable, Achievable, Relevant and Tangible);
- clear (easily understandable);
- addressing SIR (the indicator addresses the Scale, Intensity and Risk concept, together with the Notes developed for the indicator). \*Applicable only in Criteria where SIR is mentioned.
- applicable for SLIMFs (smallholders, low intensity forests, local communities, groups, indigenous people)
- needing any amendment.

It is possible to provide feedback for any IGI by writing in the comments box. It is especially helpful if you can suggest alternative wording for an IGI. Please be as specific as possible.

## 24. Principle 1

For this Second Public Consultation, the feedback we are seeking is whether you think the IGIs suggested for each criterion include all the measures necessary to verify compliance with that criterion.

In addition to this, and to answer concerns expressed in the first consultation, we also want to know if each IGI is NOT:

- globally applicable (the indicator is generic, can be adapted to different forest types, legislation, etc.);
- auditable (the indicator is SMART – Specific, Measureable, Achievable, Relevant and Tangible);
- clear (easily understandable);
- addressing SIR (the indicator addresses the Scale, Intensity and Risk concept, together with the Notes developed for the indicator). \*Applicable only in Criteria where SIR is mentioned.
- applicable for SLIMFs (smallholders, low intensity forests, local communities, groups, indigenous people)
- needing any amendment.

In addition to the multiple choice answer section, you can provide feedback for any IGI by writing in the comments box. It is especially helpful if you can suggest alternative wording for an IGI, and we encourage you to be as specific as possible.

There is also a comments box at the end of each Principle for Criterion-level feedback.

## 28. Principle 3

For this Second Public Consultation, the feedback we are seeking is whether you think the IGIs suggested for each criterion include all the measures necessary to verify compliance with that criterion.

In addition to this, and to answer concerns expressed in the first consultation, we also want to know if each IGI is NOT:

- globally applicable (the indicator is generic, can be adapted to different forest types, legislation, etc.);
- auditable (the indicator is SMART – Specific, Measureable, Achievable, Relevant and Tangible);
- clear (easily understandable);
- addressing SIR (the indicator addresses the Scale, Intensity and Risk concept, together with the Notes developed for the indicator). \*Applicable only in Criteria where SIR is mentioned.
- applicable for SLIMFs (smallholders, low intensity forests, local communities, groups, indigenous people)
- needing any amendment.

In addition to the multiple choice answer section, you can provide feedback for any IGI by writing in the comments box. It is especially helpful if you can suggest alternative wording for an IGI, and we encourage you to be as specific as possible.

There is also a comments box at the end of each Principle for Criterion-level feedback.

# International Generic Indicators Second Public Consultation

## 32. Principle 5

For this Second Public Consultation, the feedback we are seeking is whether you think the IGIs suggested for each criterion include all the measures necessary to verify compliance with that criterion.

In addition to this, and to answer concerns expressed in the first consultation, we also want to know if each IGI is NOT:

- globally applicable (the indicator is generic, can be adapted to different forest types, legislation, etc.);
- auditable (the indicator is SMART – Specific, Measureable, Achievable, Relevant and Tangible);
- clear (easily understandable);
- addressing SIR (the indicator addresses the Scale, Intensity and Risk concept, together with the Notes developed for the indicator). \*Applicable only in Criteria where SIR is mentioned.
- applicable for SLIMFs (smallholders, low intensity forests, local communities, groups, indigenous people)
- needing any amendment.

In addition to the multiple choice answer section, you can provide feedback for any IGI by writing in the comments box. It is especially helpful if you can suggest alternative wording for an IGI, and we encourage you to be as specific as possible.

There is also a comments box at the end of each Principle for Criterion-level feedback.

## 36. Principle 7

For this Second Public Consultation, the feedback we are seeking is whether you think the IGIs suggested for each criterion include all the measures necessary to verify compliance with that criterion.

In addition to this, and to answer concerns expressed in the first consultation, we also want to know if each IGI is NOT:

- globally applicable (the indicator is generic, can be adapted to different forest types, legislation, etc.);
- auditable (the indicator is SMART – Specific, Measureable, Achievable, Relevant and Tangible);
- clear (easily understandable);
- addressing SIR (the indicator addresses the Scale, Intensity and Risk concept, together with the Notes developed for the indicator). \*Applicable only in Criteria where SIR is mentioned.
- applicable for SLIMFs (smallholders, low intensity forests, local communities, groups, indigenous people)
- needing any amendment.

In addition to the multiple choice answer section, you can provide feedback for any IGI by writing in the comments box. It is especially helpful if you can suggest alternative wording for an IGI, and we encourage you to be as specific as possible.

There is also a comments box at the end of each Principle for Criterion-level feedback.

**144. Please provide your general comments for Principle 8. e.g. Are there any criterion requirements not addressed by its set of indicators?**

# International Generic Indicators Second Public Consultation

## 40. Principle 9

For this Second Public Consultation, the feedback we are seeking is whether you think the IGIs suggested for each criterion include all the measures necessary to verify compliance with that criterion.

In addition to this, and to answer concerns expressed in the first consultation, we also want to know if each IGI is NOT:

- globally applicable (the indicator is generic, can be adapted to different forest types, legislation, etc.);
- auditable (the indicator is SMART – Specific, Measureable, Achievable, Relevant and Tangible);
- clear (easily understandable);
- addressing SIR (the indicator addresses the Scale, Intensity and Risk concept, together with the Notes developed for the indicator). \*Applicable only in Criteria where SIR is mentioned.
- applicable for SLIMFs (smallholders, low intensity forests, local communities, groups, indigenous people)
- needing any amendment.

In addition to the multiple choice answer section, you can provide feedback for any IGI by writing in the comments box. It is especially helpful if you can suggest alternative wording for an IGI, and we encourage you to be as specific as possible.

There is also a comments box at the end of each Principle for Criterion-level feedback.
